ABOUT ME

AI & Data Science graduate skilled in Python, SQL, Machine Learning, Deep Learning, Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), NLP, Computer Vision, FastAPI, Power BI, and Data Analytics with hands-on industry internship experience. Passionate about building scalable AI solutions that solve real-world business problems.

EDUCATION

B.TECH IN ARTIFICIAL INTELLIGENCE AND DATA SCIENCE

Prince Dr. K. Vasudevan College of Engineering and Technology,
Tamil Nadu, Chennai - 600127

2022 – 2026 | CGPA : 7.5

SKILL

Programming: Python, SQL, Html, Css

Data Analytics: Pandas, NumPy, ETL, EDA, Power BI, Excel

Machine Learning: Scikit-learn, Linear Regression, Logistic Regression, Decision Tree, Random Forest, SVM, KNN

Deep Learning: TensorFlow, Keras, ANN, CNN

Generative AI & NLP: LLMs, RAG, LangChain, BERT, Hugging Face Transformers, ChromaDB, Ollama, NLP

Frameworks: FastAPI, Streamlit

Developer Tools: Git, GitHub, Linux, VS Code, Jupyter Notebook, Google Colab

Cloud & Deployment: REST APIs, Docker, AWS SageMaker, AWS Lambda, AWS S3

WORK EXPERIENCE

VCodez | Machine Learning Intern - (06.08.2024 – 06.09.2024)

Built a hybrid E-commerce Recommendation System using Python, Scikit-learn, Collaborative Filtering, and Content-Based Filtering, achieving 88% accuracy while processing 50K+ products with <500ms response latency.

Digitalytic Technologies | Data Science Intern - (06.08.2024 – 06.09.2024)

Performed EDA on 100K+ records using Python, Pandas, SQL; developed Customer Churn and Loan Default Prediction models with Scikit-learn; built Power BI dashboards, reducing reporting time by 60%.

PROJECTS

- The Legal AI Companion:** Developed RAG-based legal assistant achieving 87% context relevance using BERT + ChromaDB; 94% voice accuracy, <2s latency on 1000+ queries.
- AI-Powered E-commerce Recommendation:** Built hybrid recommendation engine (88% accuracy); processed 50k+ products with <500ms latency.
- AI-Powered Retail Shelf Monitoring:** YOLO + OpenCV solution (92% accuracy); reduced inventory audit time by 80%.
- Amazon Sales Analytics Dashboard:** Interactive Power BI dashboard (100k+ transactions, 25+ KPIs); 70% query time reduction.
- Banking Management System:** MySQL database (10k+ daily transactions); 99.5% uptime, 45% query optimization.
- ML Prediction Models:** Customer Churn (92% Accuracy) and Loan Default Prediction (90% Accuracy) using Python and Scikit-learn.

CERTIFICATIONS

- Data Analysis Bootcamp: Mastering Data Science (Udemy)
- Google Bard Generative AI Masterclass
